PROFESSIONAL SUMMARY

Passionate MERN Stack Developer with expertise in JavaScript, React.js, Node.js, Express.js, and MongoDB with 1+ years of hands-on experience. Quick learner, dedicated to crafting innovative web solutions and committed to seamless user experiences. Eager to contribute to technology-driven projects with a focus on quality code and creative problem-solving.

TECHNICAL SKILLS

Frontend: React.js, Redux, HTML, CSS, Tailwind CSS, Bootstrap

Backend: JavaScript, TypeScript, Node.js, Express.js

Database: MongoDB, PostgreSQL, Firebase

Integrations: Razorpay, Nodemailer, Multer, Firebase, Cloudinary, Socket.IO

Deployment: Nginx, AWS, Vercel, Render

Development Tools: Postman, Git, GitHub, Figma, VS Code

Core Knowledge: Data Structures and Algorithms

PROJECTS

Zephyr | Social Media Platform for Gamers   Live | Frontend | Backend

- Developed a feature-rich social platform using React.js, Node.js, Express.js, and MongoDB, enabling users to create profiles, make friends, join communities, and engage in real-time conversations
- Implemented ZepAI, a gaming-focused chatbot assistant that helps users with gaming-related queries and provides game recommendations
- Integrated Socket.IO for real-time messaging, notifications, and media sharing features for images, videos, and game clips
- Utilized clean architecture principles and TypeScript to create a scalable and maintainable codebase
- Built comprehensive admin panel with user management, community moderation, and support ticket system
- Implemented secure authentication using JWT and enhanced security with OTP verification via Nodemailer
- Optimized performance by deploying the backend on AWS and the frontend on Vercel

GrooveStyle | E-commerce Application   Live | GitHub

- Built a full-featured e-commerce platform using Express.js, Node.js, and MongoDB with MVC architecture
- Implemented session authentication, OTP verification with Nodemailer, and functionality for password recovery
- Integrated multiple payment options including COD, Razorpay for online transactions, and wallet system
- Developed comprehensive admin panel for product, category, and order management with analytics
- Created features for product filtering, search functionality, and user wishlist management
- Implemented product return system with wallet refund capability and referral program

MINI PROJECTS

- **Netflix Clone:** Built a responsive web application using React.js and Firebase. Implemented user authentication and dynamic content rendering. Applied Tailwind CSS for styling. [GitHub]

- **OLX Clone:** Developed a marketplace platform using React.js and Tailwind CSS, implementing user authentication and listing functionality. [GitHub]
